

The Bi-Color Flexilight is 1/2" in diameter and rated at 35,000 hours. A multi-color motion can be created depending on the controller used, so the product could be utilized as a dynamic and vivid decoration. It is perfect for catching attention and creating a vibrant atmosphere. Since we only use the highest-quality PVC material along with UV additives, the Bi-Color Flexilight can be used in indoor or outdoor applications and can withstand very hot or cold weather. With a controller, Bi-Color can create gradually changing effects that are soft and smooth. The color-changing effect also creates two appearances in the same decoration. Bi-Color is great for outlining the decoration of buildings or signs, as well as for creating an aura of harmony.
